A trash hauling permit is required when a hauling contractor other than the City of Melbourne contracted franchise hauler (Waste Management) is used. No trash hauling permit is required when the debris is recycled.

The permit shall be computed as follows:

Contract hauler fee (cost per pull) _____ x .10 x the number of pulls = _____ (Occupants hauling their own waste without the use of a third party hauler are exempt)
Total roll-off container(s) capacity (cubic yards) x \$0.33 x the number of pulls = _____
<b>Total roll-off Fee</b> _____

I HEREBY CERTIFY that I have read and examined this document and know the same to be true and correct. All provisions of laws and ordinances governing this type of work will be compiled whether specified herein or not. Granting this permit does not give authority to violate or cancel the provisions of any state or local laws regulating the disposal of solid waste generated from this operation.

This permit is required for Owners, Occupants, and Contractors engaging in construction or renovation operations, choosing to haul their own debris.

By City ordinance Section 14-4 of Chapter 14, (i) occupants of premises used for commercial or industrial purposes who transport refuse with their own vehicles, and (ii) firms engaging in building or remodeling activities requiring a city building permit shall be permitted to remove the waste accumulated as a result of their operation, provided the waste materials are stored, transported and disposed of in a manner which is approved by the city manager or his designated representative. Such approval shall be evidenced by a permit issued by the city manager or designated representative. In all such cases, the person or persons delivering such waste to the disposal facility shall be obligated for whatever fees are applicable for the disposal of such waste.

Pursuant to Section 14.4.1 of Chapter 14, all persons applying for a permit from the city manager to allow removal of accumulated waste, pursuant to section 14.4, shall pay a permit fee computed as follows

- (1) Ten (10) percent of the amount actually billed for the waste removal service to the occupant of the premises by the hauler. (Occupants hauling their own waste without the use of a third party hauler shall be exempt from this subparagraph.)
- (2) In addition to (1), a fee of thirty-three cents (\$0.33) per cubic yard of waste removed shall be assessed as a sanitation service charge.

Pursuant to F.S. Ch. 553, when work which requires a trash hauling permit is started without first obtaining a trash hauling permit, a double fee or penalty shall be assessed in accordance with section 14-60. In addition to all other penalties provided by law, any person, firm, corporation, partnership, association or other entity violating section 14-4.1 shall, upon conviction for such violation, be fined in an amount not in excess of two hundred fifty dollars (\$250.00).
